

ADVANTAGES

- Able to be installed in any manufacturer's loose-fill filters
- ISO 10121-1:2014 tested media
- UL 900 classified for flammability
- Targets oxidizable acidic gases responsible for corrosion and a wide range of volatile organic gases and odours.
- Ideal for the removal of hydrogen sulfide, formaldehyde, ethylene, low to medium molecular weight VOCs, and higher volatility organic contaminants
- Adsorption of the criteria air pollutants: ozone, nitrogen dioxide, and sulfur dioxide.

| | |
|------------------------------|--|
| Application | Targets oxidizable acidic gases responsible for corrosion and a wide range of volatile organic gases and odours in a single stage when space is limited. |
| Media | Activated Carbon; Impregnated Activated Alumina |
| Max Temperature (°C) | 40 |
| Min Temperature (°C) | 10 |
| Relative Humidity max | 40%-70% |
| Installation Options | All loose-fill molecular air filters. |
